Shawn, thanks. Between this info and what I already received from Ward Herst and Paul Rosasco, I have what I need to help understand my gamma log data in terms of influences from the well construction materials.

Sincerely,

Subject: West Lake Landfill boring logs

Dan,

During my file organization I ran across a collection of well construction details. According to the transmittal letter these drawings originated from the Groundwater Conditions Report for West Lake Landfill Areas 1 & 2 by McLaren/Hart dated November 26, 1996. I thought you might find them useful per your request for our well registration logs.
